

AbiBowClass

Construction Paper and Project Rolls

AbitibiBowater produces an industry-leading collection of quality construction papers. Our manufacturing process uses state-of-the-art, environmentally friendly TMP (thermo-mechanical pulp) which requires less natural resources to produce and delivers more sheets per ton – without sacrificing quality – which means more savings to you.

Available in a variety of eye-catching colors in both lightweight and heavyweight basis weights, AbiBowClass provides unsurpassed quality with no “weak” spots you may find in non-TMP groundwood sheets.

All our papers encompass these four critical attributes:

- Intense, eye-catching colors and sulphite-like appearance
- Side-to-side conformity – no dull, imperfect sides
- Strong, flexible and thick construction through advanced TMP technology
- Consistent quality – ISO Certified

PAPER	BASIS WEIGHT	CALIPER
AbiBowClass Light Weight	42.5# (24 x36x500) 69.2 grams	6.9 (1/1000 of an inch)
AbiBowClass Heavyweight	55# (24 x36x500) 89.5 grams	9.3 (1/1000 of an inch)

All available from stock in 36 1/4" x 45" roll size

Custom sizes also available subject to order minimums

Other sizes, basis weight and color combinations are available subject to certain order minimums

AbitibiBowater produces a broad range of forest products marketed in more than 90 countries around the world. Our customers include many of the world's largest publishers, commercial printers, retailers, consumer products companies and building supply outlets.

We are also among the largest recyclers of newspapers and magazines in the world. The sustainability of our forest resources is a key priority: it is both an ethical and business imperative. Our sustainability certification process stands as proof of our commitment to current and future generations of employees, to the communities in which we live and operate, and to investors.
